

Vault Training Courses

How many of you have been using Inventor for at least 6 months, but for whatever reason have not yet made the move across to implementing Vault?

Well now is a good time to make that move. The Vault product is now running the best it ever has done, it is more reliable, and easier to use. To make things even easier for a Vault implementation, we at ENVIZAGE have now redeveloped and re-written our training documentation, which now simplifies and explains in detail the way Vault works, how to install it, how to set it up, and how to use it.

Also, if you are an existing Vault user and you have never had training you would benefit greatly from this course.

So what are you waiting for? Enrol in one of our Vault Fundamentals courses now:

Melbourne VIC

January 29-30
February 19-20
March 16-17
April 8-9

Sydney NSW

February 26-27
March 30-31
