

A Unique All-Inclusive Technology Partner...

[envizage: to conceive an idea, to believe to be possible or likely in the future]

Imagine an Australiawide business capable of providing you with all-encompassing expertise, world-renowned technology and support. With the ability to safely and cost effectively guide you along your journey of technological improvement. Helping you become more innovative... get to market quicker... be more productive... and more competitive here and overseas.

ENVIZAGE is a business like no other. A part of the privately owned Australian company CONCENTRIC Asia Pacific, we are specialists in a range of synergistic digital, virtual reality and physical product realisation disciplines including:

- ▶ Animation
- ▶ Digital prototyping
- ▶ Engineering
- ▶ Product design
- ▶ Prototyping
- ▶ Rapid manufacturing
- ▶ Serious games
- ▶ Simulation and simulated training
- ▶ Virtual reality content
- ▶ Visualisation

ENVIZAGE is equipped with Autodesk's entire range of digital prototyping solutions (AutoCAD LT, AutoCAD, AutoCAD Mechanical, Autodesk AliasStudio, Autodesk Electrical, Autodesk ImageStudio, Autodesk Inventor, Autodesk Portfoliowall, Autodesk Productstream, Autodesk Showcase and Vault) which are complemented by our advanced manufacturing facility.

For serious gamers and simulation content creators we offer 3DVIA Virtools technology. a key development tool in the game industry for over six years, use it to develop exceptional interactive real-time applications for industry and game production. Whether for online, desktop-based, large-scaled interactive digital mock-ups or video game consoles. 3DVIA Virtools allows the creation of real-time interactive experiences with superior graphics and complex interactivity. 3DVIA Virtools creates cutting-edge simulations and immersive experiences that exploit the breadth of industry standard VR peripherals and power of PC-based distributed computing (clusters). It transforms marketing/multimedia/learning applications into compelling, fully interactive 3D experiences.

Whether you are designing a new product... developing a game for Playstation or Xbox... or creating interactive training or maintenance materials, ENVIZAGE is your technology partner from the initial concept to end-of-life.

"Together, the entire range of Autodesk products provides what they refer to as Digital Prototyping. This encompasses the full cycle of product development", says manager Mach Dinh-Vu, "Not only do we feature the Autodesk suite of solutions, we also have an experienced team of engineers around the nation capable of providing on-demand services... as an extension of an engineering department in times of peak capacity, or when specialist assistance is required such as finite element analysis."

The ENVIZAGE advanced manufacturing facility located at Brisbane Technology Park features a foundry, casting facility, 3D printers and rapid prototyping, industrial spray booth, NC machining, and a specialist hand assembly-finishing team.

We have a diverse customer base from craniofacial surgery to aerospace. From car makers to cook tops, mining trucks to medical equipment, artificial knees to architects, state government trophies to sports cars, train cabins to the Torana TT34 concept car. ENVIZAGE has contributed to Toyota winning back-to-back Australian Rally Championships and Manufacturers Championships, and to teams in the V8Supercars and Nurburgring 24 Hour race. We have the ability to produce life like full size products with working components, and either one part or one thousand parts made from low-cost prototype or final production materials.

ENVIZAGE operates from offices in Sydney, Melbourne, Adelaide, Perth and Brisbane, and representation in Canberra and New Zealand. The team includes business managers, services engineers, accredited trainers, support technicians and manufacturing specialists. Via CONCENTRIC Asia Pacific, ENVIZAGE is also part of a worldwide knowledge/resource-sharing alliance with high profile engineering technology providers in India, France and the United States.

"Companies can partner with us from the time they create a raw concept and by utilising the Autodesk digital prototyping solutions and our understanding of the global market, along with our physical prototyping and rapid manufacturing technology, we can help them get their products to market a lot quicker and more efficiently", says Michael Myers, Managing Director of CONCENTRIC Asia Pacific which is celebrating its 25th year of operation.

Australia's most unique portfolio of offerings:

- ▶ 3D Modelling
- ▶ Animation Technology
- ▶ Analysis Solutions
- ▶ At-Elbow Support
- ▶ Back-up Solutions
- ▶ Consulting
- ▶ CAD/CAM/CAE
- ▶ Collaboration
- ▶ Computer Hardware
- ▶ Contract Engineers
- ▶ Data Exchange
- ▶ Data Management
- ▶ Design Assistance
- ▶ Finite Element Analysis
- ▶ Human Simulation
- ▶ Implementation
- ▶ Knowledge Management
- ▶ Laser Scanning
- ▶ Reverse Engineering
- ▶ Subject Matter Experts
- ▶ Simulation
- ▶ Systems Integration
- ▶ Training
- ▶ Virtual Manufacturing
- ▶ Virtual Analysis
- ▶ Virtual Reality
- ▶ Visualisation
- ▶ Middleware
- ▶ Model Making
- ▶ Network Administration
- ▶ NC Programming
- ▶ Production Engineering
- ▶ Product Support
- ▶ Programming
- ▶ Project Management
- ▶ Rapid Prototyping
