

Metro Ethernet

MORE COVERAGE. MORE OPTIONS. MORE PERFORMANCE. FOR LESS.

Metro-E is an advanced multi-carrier service for businesses wanting to connect multiple offices within a city or across Australia, connect offices to a data centre, or link multiple data centres.

It combines high speed voice, video and data performance - up to 10Gbit - with outstanding flexibility to easily meet changing communication requirements. Providing seamless service today and into the future.

Metro-E offers straightforward connectivity to existing networks and LAN equipment, and very quick deployment. With the added benefit of substantial cost savings over traditional WAN technologies.

The Metro-E service delivers nationwide coverage to all capital cities - and regional areas - via an independently owned and operated network.

- VoIP services
- High speed internet and email
- Videoconferencing
- Multimedia webcasting
- Virtual Private Networks

FEATURES

- Multi-carrier network providing unparalleled coverage and reach;
- Dedicated "end-to-end" bandwidth;
